

TITTLE:

Special Education Support for University Students with Dyslexia

ABSTRACT:

The diploma thesis is focused on special education support for university students with dyslexia. The task of the theoretical part is to describe diagnostics, learning strategies, reeducation of dyslexia and possible support for students with dyslexia at the university. The theoretical was drawn from the scientific literature. The aim of practical part is to detect how Universities provide support to their students. The aim was achieved by using analysis of university documents and websites and survey.
